

UNI PARTS – UNITED IN DIVERSITY

Atlas Copco

UNI PARTS – PARTS YOU CAN TRUST

THE RIGHT PARTS FOR ALL

As a single source provider for all parts and service items, Atlas Copco takes care of your entire compressor room.

This requires a wide variety of parts.

UNI Parts are spare parts for compressed air equipment other than Atlas Copco.

For compressors, it includes maintenance parts and kits, spare parts, lubricants, valve kits and exchange elements.

For air treatment equipment, we offer maintenance parts and kits, line filters, desiccant and accessories.

SHARING OUR STRENGTH

How can Atlas Copco deliver on its promise?

As a leading manufacturer of compressors and air treatment equipment, we have in-depth know-how of all air compression technologies. Atlas Copco owns many companies and brands offering compressed air solutions.

Thanks to our worldwide presence and supplier network, we have various sourcing options: our own Atlas Copco suppliers, suppliers to the other brands or the original equipment manufacturers themselves.

Whatever the source, we always choose the best solution to ensure equipment integrity and reliability, as well as the quality of your compressed air.

KEY STRENGTHS OF UNI PARTS

- 1 UNI Parts are an Atlas Copco product line, reflecting our quality standards and expertise.
- 2 UNI Parts are not just parts that fit. They were selected specifically for the equipment and the application.
- 3 UNI Parts meet or exceed the specifications of the originally installed part.
- 4 UNI Parts assure the reliability of the installation and the quality of the compressed air.
- 5 UNI Parts offer the convenience and efficiency of a single source supplier, reducing administration and maintenance costs.
